

DRAKENSBERG LAYING CHICKEN FEED

Product Info

Producing eggs puts quite a strain on a bird nutritionally. This is why we expertly designed and formulated layer feed for natural, balanced nutrition to support production of fresh, hard-shelled eggs in free-range and home-raised flocks. This is a complete, nutritional diet for layer chickens with no need for supplementation. Naturally high in protein, vitamins and minerals that will promote hen health, immune system support, overall health and good egg production. It is fed from 18 weeks as a pullet comes into lay. Typically 15 to 17% Protein.
